- Bending Equipment
- Processing Equipment
- Neon Accessories
- Maxi-Vac™ Pumping System

Introducing Four New Colors

EGL continues to lead the industry by developing more new colors than any other manufacturer.

HP Neo Blue

Brighter, more brilliant double coated blue with better end-to-end uniformity and less "wash-out" in the bends. Tinted blue when unlit.

HP Blue

High output pastel blue resistant to staining in bends and splices. Maintains lumen output.

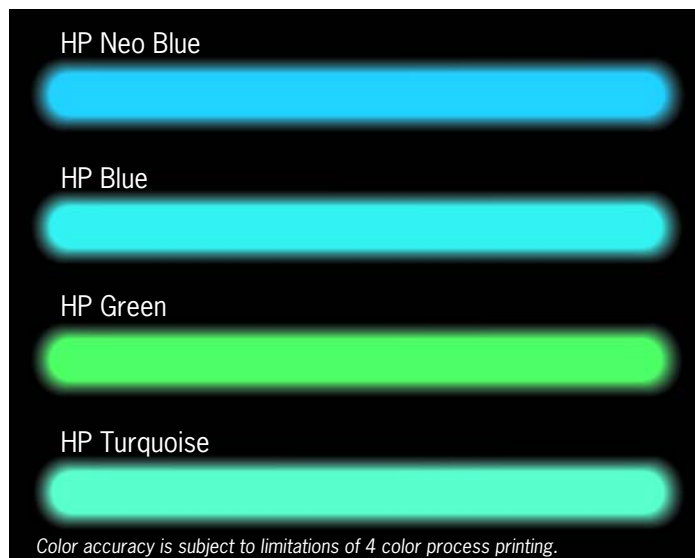

HP Green

Higher output green resistant to staining in bends and splices. Maintains lumen output.

HP Turquoise

A higher output turquoise which maintains lumen output and brightness.

**Neon fill will produce different colors than standard EGL blue, green and turquoise.*

For more information regarding these products and the entire EGL product line please visit us at www.egl-neon.com, call (908)-508-1111, or email us at newproducts@egl-neon.com.
