# VERITAS

LED Systems

1000

Disappointed with the brightness of your LED channel letters? With **EGL Veritas 1000 White LED** system you don't have to sacrifice sign brightness for decreased energy consumption. With a system power draw of 2.5W per foot you get an extraordinary 180 lumens per foot of light for attention – grabbing illumination. No more dim LED channel letters. Colored sign faces, vinyls, even perforated duo-films “pop” like they were lit with EGL CL Designer® white neon.

## Features:

- ◆ 2 modules per foot. Approximately 180 lumens per foot. 2.5W per linear foot when powered by high efficiency EGL LED driver (LE-PS60-12).
- ◆ 3-die high efficacy (110 lumens per watt) Nichia LM80 compliant LED with dies wired in series for optimum system efficiency.
- ◆ Outstanding lumen output maintenance. Exceptional heat handling characteristics coupled with conservative running current results in negligible brightness drop-off common with most LED systems.
- ◆ 5 year warranty.
- ◆ Tight “Energy Star” binning ensures minimal batch-to-batch color variation.
- ◆ On-board intelligent IC current control chip allows long runs with no variation in brightness. Automatic power regulation at increased temperatures for even longer LED life.

## Module Specifications

Part No.:	LEV1000-65W
Color*	White (6500K)
Typical brightness	90 lumens per module
Modules per foot	2
Supply voltage	12VDC nominal
Power consumption	1.1W per module System 1.25W per module
Max. loading per 60W power supply	50 modules
Current control	On-board IC current regulation
Viewing angle	120 degrees
Operating temperature range	-40°C to 65°C
Dimensions	1.41 in. L x 1.46 in. W x 0.34 in. H
Fastening	3M Peel-n-stick adhesive tape and mechanical
Packaging	50 modules per carton 5 cartons per box
Certifications	UL Recognized E342649 (dry and damp locations) RoHS compliant, CE

\* Additional color temperatures available soon
